WATER CONSERVATION POLICY

MSAJAA views water from the three inter-related dimensions of Efficient Conservation, Responsible Consumption and Restoring and Retaining surface and groundwater.

The primary goal of the water conservation policy is to provide safe and clean water on the whole campus. Reducing water consumption and protecting water quality shall be the key objectives of the sustainable policy of the institute.

Objectives:

- To maximize water use efficiency and minimize wastage of water.
- To increase the recharge of groundwater by rainwater harvesting from rooftops and run-offs.
- To ensure awareness about the water conservation policy of the college among all the staff and students through posters.
- To create awareness about the cost-effectiveness of water conservation projects among students and local communities.
- To organize various outreach programmes under the leadership of NSS for clean and safe potable water.
- To promote students to monitor and collect information related to water bodies and their pollution of nearby areas.

Action Plan:

- Enhance the efficiency of plumbing fixtures, thereby minimising potable water use.
- Install sensor fittings in toilets.
- Reusing RO drain water for vessel washing.
- Prepare rainwater recharge pit.
- Install water-meter to improve the water performance of the building, and thereby save potable water
